VERY LIMITED PREVIEW

Start with learning you can see

A small taste of the approach. The practical working kit is in the paid download.

AI can make a plan look complete while leaving the teacher with unclear questions, wrong answers and more checking. A useful workflow starts with an objective and ends with a human-reviewed resource.

One tiny example

Broad: "Understand fractions."
More inspectable: "Show why 1/2 and 2/4 represent the same amount when the whole stays the same."

Inside the full kit	What you can work on
56-page illustrated guide	Planning, adaptations, assessment, feedback and communication.
14-page fillable workbook	Your own briefs, checks and workload review.
12-page resource pack	Two original lesson examples with teacher guidance.
40 prompts and 8 templates	Reusable drafting structures with teacher checks.
Offline planning workspace	Live progress, lesson timing and net time-review tools.

Preview boundary

The complete prompts, lesson plans, classroom worksheets, answer keys, workbook and interactive workspace are supplied only in the full kit.

Independent educational resource by Emmanuel Abou Chabke, published by Market Me Global. No guaranteed time saving or learning outcome.

GET THE FULL KIT

Prepare a useful draft. Keep teacher judgement.

INTRODUCTORY OFFER

EUR 5.99 for the first 10 buyers.
Then EUR 11.99. One-time purchase of the full kit.

Get the complete guide, fillable workbook, original classroom resources, 40 prompts, editable templates and offline planning workspace in one download. Tool subscriptions are separate; follow your school's approval process.
