

MARKET ME GLOBAL ACADEMY

FREE PREVIEW / AI GAME CREATOR KIT

BUILD YOUR FIRST GAME

A small idea. A playable result.

Discover the complete kit at [Market Me Global Academy](#)

Emmanuel Abou Chabké / October 2026

FREE PREVIEW

You have the idea. Build the first loop.

A glowing portal. A forest full of crystals. A village waiting for dawn. The idea is exciting, but the first question is simple: what can the player do?

The full AI Game Creator Kit shows how to turn an idea into a small working game, using focused tasks, clear instructions and checks you can see for yourself.

Original concept artwork from the full kit.

Start smaller than you think

One player. One objective. One obstacle. One clear ending. Finish that loop before building a bigger world.

A LOOK INSIDE

Three projects. Three useful skills.

Original concept artwork for the dialogue quest.

Project	What it teaches
Crystal Courier	Movement, collecting and a locked exit
Lantern Keeper	Dialogue, inventory and quest progress
Relay Arena	Aiming, targets and a timed challenge

The full kit reveals the tool choices, setup steps, copy-ready prompts and project materials. This preview leaves the implementation for the complete edition.

TRY THIS FIRST

Describe your game in one sentence

Mini exercise

The player _____ to _____ while _____.

Now name the moment the player wins. If you cannot describe the ending clearly, reduce the idea until you can.

My game idea

How the player wins

That sentence becomes the starting point for a game brief, a focused build plan and your first playable prototype. The full workbook guides you through the next steps.

THE FULL KIT

Turn the idea into something you can play

- The complete practical guide with tool comparisons and setup instructions.
- Three guided project paths and original starter materials.
- 40 focused prompts, including new 3D asset creation and import prompts.
- A printable exercise workbook and guided capstone.
- Project templates, cost planning and testing checklists.
- Original artwork and a primary-source register.
