VERSION 1.0 / OCTOBER 2026

A clearer offer starts with a clearer brief

A client asks for "a complete service". You need to define what they receive, calculate the price and explain the next step. This kit gives you a practical workflow and editable files for that job.

One useful improvement

Vague: "Build a great website."

Clearer: "Build five agreed pages with one contact form and two consolidated review rounds."

That sentence still needs the acceptance check, client inputs, exclusions and price. The full kit shows how to connect those parts and gives you editable proposal and quote templates.

What this preview includes

A small look at the approach and the files. The full master prompt, calculators, editable templates and worked proposals are available in the paid kit.

See what is inside the full kit

Included file	Practical use
32-page visual guide	Follow the process from enquiry to approved quote
Five editable Word templates	Discovery, short proposal, detailed proposal, quote and change order
Local browser builder	Calculate totals, save a project and print a client quote
Editable Excel calculator	Check price, deposit, balance and internal margin
Master prompt plus 21 focused prompts	Draft, review, communicate and translate
Three fictional worked examples	Freelancer, local service and agency
Quote tracker and send checklist	Record versions, decisions and next actions

Use your chosen AI service for drafting when appropriate. The browser builder itself runs locally and does not require an AI subscription or API connection.

Who it is for

Freelancers, trades and local service owners, consultants and small agencies that prepare clearly scoped client offers. No sales result is guaranteed.
