VERY LIMITED PREVIEW

Make the listing easier to trust

A small taste of the approach. The working system is in the full kit.

AI can write a convincing description of a product that does not exist. A useful seller workflow starts with the real contents and checks the draft against them.

One tiny example

Vague: "The ultimate planner for everyone."
Clearer: "Three undated printable sheets in A4 and US Letter. No physical item or editable template."

Inside the full kit	What you can work on
52-page illustrated guide	Positioning, research, listing, visuals, promotion and review.
12-page fillable workbook	Your own facts, decisions and implementation notes.
36 adaptable prompts	Copyable recipes with inputs and human checks.
Offline workspace	Live progress, title/tag checks, cost plan and review log.
Templates and examples	Six editable templates and two fictional worked listings.

Preview boundary

This preview does not include the full prompts, worksheets, checker, calculator, research method or worked listing pack. Those are supplied in the paid download.

Independent educational kit by Emmanuel Abou Chabke, published by Market Me Global. No ranking or sales outcome is guaranteed.
